

Cushion Nima Basic

Pressure redistributing wheelchair cushion — bevelled underside edges and a rear cut-out

Intended use

Pressure redistributing wheelchair cushion in high-resilience cold foam for users who can vary their sitting but need a wheelchair for transport. The cushion has bevelled edges on the underside and suits both hammock and flat seats. A rear cut-out accommodates the wheelchair tubes. The soft character of the foam base gives comfortable sitting, and both base and cover breathe well, providing a good microclimate.

Use environment: primarily wheelchairs — can also be placed in other seating. **Users:** the user themselves, or care staff/relatives following a needs assessment. **Delivery:** the cushion is delivered ready to use — check the size on fitting. **Material:** cushion base of high-resilience, fire-retardant cold foam. Fire-retardant, breathable polyester cover.

Construction

Cushion base of high-resilience, fire-retardant cold foam with a breathable, fire-retardant polyester cover. Bevelled underside edges suit both hammock and flat seats; the rear cut-out fits around the wheelchair tubes.

How to use the cushion

1. Take the cushion out of its packaging.
2. Place the cushion with the **BAK** (back) label towards the rear of the seat — the side label indicates the side.
3. Check that the size fits the seat and that the user's weight is within the stated limit.
4. The cushion is ready to use — no adjustment needed.

Reconditioning & care

Between users: wipe the cushion base with disinfectant or soap solution. **Do not machine wash the cushion base.**

Drying: dry the base flat in a drying cabinet or lying freely.

Cover: machine wash 60 °C, tumble-dry safe.

Disposal: a worn-out cushion is sorted as combustible waste.

Important to keep in mind

- **Place the cushion correctly according to the labelling** — the cut-out towards the wheelchair tubes at the rear.
- The cushion must **not be cut down** with the CE marking retained.
- Inspect the cushion and the skin regularly.

User weight	Max 150 kg (all sizes)
Material	High-resilience cold foam · Fire-retardant polyester cover
Design	Bevelled underside edges · Rear cut-out · Suits hammock and flat seats
Sizes	Seat width/depth per article number (NBsbsd)
Weight	0.5–1.0 kg depending on size
Service life	Expected 5 years · Warranty 2 years

Accessories

- Standard cover, breathable polyester (*included*)
- Incontinence cover
- Hygiene cap

See page 2 for symbol explanations and full MDR info.

Technical documentation and MDR information

Supplementary regulatory information under Regulation (EU) 2017/745 on medical devices (MDR). Intended use, construction, user weight, accessories and care are stated on page 1.

Product identification and classification

Article number format: NBSbsd (where sb = seat width, sd = seat depth in cm — e.g. NB4545).

ISO code: 04 33 03 — Pressure redistributing seat cushion.

Classification: Class I medical device under MDR (EU) 2017/745, rule 1.

Intended user: the user, following a needs assessment by a licensed prescriber.

UDI-DI: Each size has its own UDI-DI per GS1 (GTIN). Example: NB4545 → GTIN 7333376000293.

Barcode: EAN-13.

Sterile/reuse: Non-sterile; reusable between users after reconditioning as instructed on page 1.

Testing and standards

Fire tested per: ISO 7176-16 (resistance to ignition of upholstered wheelchair parts).

Symbols: Labelling per EN ISO 15223-1 (medical devices) and ISO 3758 (textile care).

Quality management: Manufactured under ISO 13485.

Declaration of conformity: The manufacturer has issued an EU declaration of conformity — contact Nimacare AB for the current version.

Restrictions

- Users with an **existing category 3 or 4 pressure ulcer** on the seating surface — require assessment by a licensed prescriber before use.
- User weight exceeding the permitted limit for the size in question (see page 1).
- Use of a damaged cushion.

Storage, inspection and environment

- Inspect the cushion and cover regularly — a damaged product must not be used.
- Avoid use near open flames or strong heat sources.
- Store cool and dry. Avoid prolonged direct sunlight.
- Do not use solvents for cleaning.

Modification

The cushion must **not be cut down**. If another size is needed — choose another size from the range. Modification or cutting voids the CE marking and releases the manufacturer from liability. The bevelled underside edges allow use in both flat and hammock seats.

Residual risks

As with all seat cushions, a risk of pressure injury remains with prolonged uninterrupted loading or if skin checks are omitted. **Incorrect size or orientation** can increase the risk of pressure injuries, unstable sitting and malpositioning. Users with reduced sensation or circulation require particular follow-up.

Reporting of serious incidents

Serious incidents related to the use of this product must be reported to Nimacare AB (info@nimacare.se) and to the competent authority of the Member State where the user and/or patient is established. In Sweden, incidents are reported to the **Swedish Medical Products Agency (Läkemedelsverket)** (www.lakemedelsverket.se).

Symbol explanations

Medical device symbols per **EN ISO 15223-1**. Wash and care symbols per **ISO 3758**.

Medical device

Consult instructions for use

Wipe clean — base only, no machine wash

Dry flat — cushion base dried flat

CE marking — complies with MDR (EU) 2017/745

Manufacturer

Machine wash 60 °C — cover only

Tumble dry allowed — cover, normal temperature

Document information: This product sheet constitutes both product information and instructions for use in paper form per MDR (EU) 2017/745, Annex I, section 23. Latest revision: 2026-07-30. Document ID: NIMA-NB-EN-IFU-Rev2026-07-30. If this version differs from a later version published at www.nimacare.se, the later version applies. The product is UDI-DI labelled — check that the UDI on the label matches the delivery.
